Joyner's Camp Meeting: 1920

The annual Camp Meeting which was brought to a close last Thursday night at Joyner's Camp Ground was in every essential sense a marked success. Notwithstanding the collapse of the bridge over which the campers reach the grounds and the daily rains later the crowds were good.

The grounds were clean and attractive, conditions in and around the camp were as sanitary and desirable as an interested and intelligent people could make them. The hospitality of the campers was of the old time Southern sort. The preachers present certainly labeled themselves the "salt of the earth" as they went about keeping good victuals from spoiling.

The preaching of Dr. J. A. Burrow, of Chattanooga and editor of the Midland Methodist, was of a very high order and was pleasing to all who came to the services. It is very doubtful if a more interesting or satisfactory series of sermons have ever been delivered at Joyner's. Dr. Burrow certainly won the love and high esteem of all who came in contact with him.

The messages of Dr. W. J. McCoy each afternoon charmed and instructed all who heard him.

Doctors Peoples, Douglass, Jordan and Swift preached to the delight and edification of all. The singing was under the inspiring leadership of Dr. R. L. Duckworth of Jackson, Tennessee. Miss Sam Taylor skillfully presided at the piano.

The fellowship and association on the grounds were gracious and joyous. The spiritual tone was high, the order perfect. The social feature of the meeting was delightful throughout the entire time.

Rev. P. H. Fowler, a pioneer man in Israel, was the acting president. He won the love and esteem of all who came, through his quiet, dignified and competent leadership.

All in all the meeting just closed was a spiritual, intellectual and social success.

Just a word in reference to the future of this historic Camp Ground made sacred through hallowed association and memories of the past. The location is splendid, surroundings beautiful and beautiful, the spring water unsurpassed in all the land, accommodations ample.

In view of the fact that we really to the management the new administration and make next years meeting the greatest in the history of Old Joyner's Camp Ground?

"I spend a \$1 on Rat-Snap and Saved the Price of a Hog."

James McGuire, famous Hog Raiser of New Jersey says, "I advise every farmer troubled with rats to use RAT-SNAP. Tried everything to get rid of rats. Spent \$1 on RAT-SNAP. Figured rat killed, saved the price of a hog." RAT-SNAP comes in cake form. No mixing with other foods. Cats won't touch it. 1 lb. 25c, 5 lb. \$1.00. Sold and guaranteed by Rhea Drug Co. W. S. Shinnalt G. W. Locke.

Murrell-McNeill

At the residence of the bride's cousin, Mr. and Mrs. W. M. Mayo, on Thursday evening, September 9, Miss Lucy Mayo Murrell was united in marriage to Mr. Charles W. McNeill of Boyles, Mississippi. Rev. E. A. Tucker, pastor of the Methodist church, officiating. The bridal party left at once for Biloxi and New Orleans for a brief honeymoon and will make their home at Boyles where the groom is a prosperous planter, having moved to that state from this county a few years ago.

The bride is a daughter of the late B. F. Murrell of this county. She completed her high school education here and studied and traveled abroad for a year, later taking a course in commercial studies and accepting a position in the office of J. T. Jordan, County Trustee, which she held until the end of his last term of office, the first of this month.

She was of a happy disposition that won her many friends, was one of the county's most efficient office women, and she leaves here a place that will not be easily filled. The Falcon congratulates the groom and wishes the happy couple lasting and long happiness.

To Falcon Subscribers

We have this week a young lady making out and mailing subscription bills to Falcon subscribers. We have well over \$2,000 in past due subscriptions to say nothing of the amount due us on renewals for the coming twelve months. We are billing for past due subscription and renewals and we ask our friends to give us the amount due us as shown by subscription bills which you will receive in the next ten days.

The Falcon office never fails its employees their weekly pay envelope on Saturday night, never has and never wants to. We can do this only if our patrons pay us. We have taken the discount on almost every bill since the Falcon has been under its present ownership and we want to continue this practice. Paper now costs more than ever in the history of this country and to meet these bills our customers must bear their part by paying up. This is the first time in nearly two years that we have sent out bills for subscription. Some pay without being sent a bill and we thank the neighbors never pay and we lose it, still others pay when they get the bill calling attention to it. This last lot is one we want to reach now. Pay us so that we can pay the other fellow. Eight thousand country papers have gone down under the pressure of high prices. We don't want the Falcon among the number. Send check to cover your bill, or if it is not correct, write us and we will make it correct.

When the towels feel uncomfortable and you miss the exhilarating feeling that always follows a copious morning operation, a dose of HERBINE will set you right in a couple of hours. If taken at bedtime you get its beneficial effect after breakfast next day.

Sold by Price Drug Co.

Rhea Drug Co. Rexall Pigeon Contest

Local interest has been aroused to a high pitch in the Rexall Pigeon Derby to be flown at St. Louis on Sept. 25, next, and in which a pair of homing pigeons, to be released by Rhea Drug Co. of this town will participate. In all 5,000 homing pigeons are to take part in this race, each having been bred, hatched and trained in the Rexall Pigeon Loft, St. Louis, the largest in the world.

These lofts were built especially for the birds that are to compete in this race. More than 500 homing pigeons of the very best strains obtainable were purchased and established in the lofts as breeders. From this nucleus the younger birds have been bred until, today, the lofts boast more live pigeons than any other in the world.

Scores of married men who have visited the great pigeon loft in St. Louis have revealed to them by this feathered clan some beautiful examples of domesticity. The most predominant trait in the character of the homing pigeon, of course, is his love of home. His birthplace, the loft in which he is bred, reared and trained, is home and no other spot on earth, no matter how alluring, has any interest for him. He may be carried off, miles from home, and tossed into space. Eventually he will return. It may take days, or it may be only a matter of hours, but no anxiety is felt on the part of his mate, for she knows that he will be back, sooner or later. Devotion to mate in their young, and love of home is so dominant in their natures that they are oblivious to all else.

There are no slackers in these families. Both male and female do their part towards making a home. The male finds the materials of tabacco stems, and the female sets herself to the task of actual nest building. Once mated, pigeons remain mated for life. They never waver in their constancy and loyalty to and love of mate. At the age of three months the young pigeon looks about for his wife, once he wins her, and this only after the most ardent wooing. He is here till death and he slaves for her and their progeny from dawn till dark.

A large corps of trainers and attendants are required to care for and train the pigeons and to this end the United Drug Company has spared no expense. The cost attending the feeding of so many pigeons itself constitutes a heavy item of cost.

The race will be confined to Rexall druggists doing business within a five hundred mile radius of St. Louis. Each of these druggists will enter a pair of pigeons in the race, the birds being shipped to him from St. Louis lofts. The birds will be released for the speedy flight to St. Louis at a specified hour, handicaps as to the distance having been carefully worked out, and the fast bird to "trap in" at the St. Louis lofts will receive the golden prize.

In each town, as here, a local programme will be arranged in connection with the release of the pigeons. The mayor, either in person or through authority delegated some pretty girl, will speed the pigeons on their way with a written message beneath their wings for the Governor of Missouri who will greet the little races upon their arrival.

The occasion of this race is for the amusement and entertainment of the 8,000 or more Rexall druggists of the United States who assemble in St. Louis on Sept. 25 for their annual convention, made especially interesting this year because of the inauguration of the new \$4,000,000 factory the United Drug Company has just completed in St. Louis for the manufacture of Rexall products.

Of course pigeon fanciers, the world over, are focusing attention upon this race and the Pigeon Section of the Signal Corps, U. S. Army, will officially observe the race and keep close check on the time made by the Rexall Pigeons. Frank P. Lucke, president of the International Federation of American Homing Pigeon Fanciers, will be one of the judges of the race and he is keeping close watch of every step of progress made in its preparation.

The pigeons will be released by Dr. J. W. Morris, Mayor, at 10 o'clock sharp, Saturday morning, September 25th.

Registration of Voters

By virtue of the authority vested in us as the Board of Registration and election Commissioners for Fayette County State of Tennessee, we hereby direct that the Registration books for District No. 1, be opened on three days, September 20, 21, and 22, 1920 for a supplemental registration of voters precedent to the Special Election in the first civil district of said county and state called for October 15, 1920.

And for the purpose of holding said Registration Miss Bill Reeves and Miss Clarice Jordan are hereby named Registrars.

F. B. MOORMAN Chairman
W. T. LOGGINS Secretary;
W. S. LATTA Commissioners
This Sept. 12, 1920.

In every home where there are children there should be a bottle of WHITE'S CREAM VERMIFUGE. It destroys worms and acts as a tonic in the debilitated system. Sold by Price Drug Co.

Production Depends On Increased Soil Fertility

Probably at no time in the history of his county has there been a greater need for increased fertility of the soil than now. The soil is wanting humus. The one crop system has greatly reduced the supply of it. These were some of the points brought out at the West Tennessee Farmer's Institute. A good system of crop rotation will put needed humus in the soil. Some of the cover crops that might be planted are: Crimson clover, vetch, or turf-oats. These crops should be plowed under the spring after they have been used as a winter and early spring pasture.

For nearly five years the world was busy destroying the accumulation of centuries and during that time many ordinary things were left undone. Now, every man in some way must help replace this loss. A large percent of the men who went to war were taken from the farms. This of course, lessened farm labor.

This shortage of labor and food supply must be overcome by increasing the fertility of the soil; lessen the number of acres per man and mule; and by practicing good cultivation.

One acre properly cared for and fertilized will produce as much or more than four acres not made rich in plant food. In other words one man can make as much on one acre of rich land as on four acres of poor land.

So a part of your land in clover or other soil building crops. Grow more livestock; pasture some of your land, and look after proper drainage. Enrich and deepen your soil and make a greater yield of crops.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the Blood on the Mucous Surfaces of the System thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative power of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CURENEY & CO., Toledo, Ohio. Sold by all Druggists, 75c.

Notice of Sale

On Saturday, October 16th, 1920, at 11 A. M., I will sell for Cash to the highest bidder the following REAL ESTATE, the property levied on as the property of Dudley W. Hunsucker to satisfy assessments made by the U. S. Government in the sum of \$765.63. The sale will take place on the premises of Dudley W. Hunsucker on the State-Line road about 4 miles southwest of Morcov, Tenn., (Fayette County.)

The property; fifty (50) acres, the north half of Lot No. 3, Sec. 6, Township 1, Range 2, west of the basis meridian line in Fayette County, Tenn., also ninety five (95) acres in the Chickasaw Survey known as Lot No. 2, Sec. 6, Township 1, Range 2; there being in both tracts, one hundred and forty five acres, more or less. Being the same land conveyed to D. W. Hunsucker by J. J. Burnett and W. M. Mayo by deed of date January 2nd, 1920.

THIS PROPERTY will be sold subject to prior liens and encumbrances, C. B. MOUNT, U. S. Deputy Collector, Memp. Tenn., Sept. 11th, 1920.

High School Opening

Monday morning of this week the Fayette County High School began its 1920-21 session with a record attendance and with every prospect of making the coming year one of the best in the history of the high school. At the first day's assembling there were many parents and friends of the school and talks were made by the Chairman of the County Board of Education, the County Superintendent, the Mayor of Somerville others on behalf of the town and county and the Principal, Prof. J. H. Forbis, made the principal address of the program, outlining his plans and policies for conducting the school the coming year.

Prof. Forbis comes to the school here with the very strongest possible testimonials as to his fine ability as a school builder and school manager and disciplinarian, and his talk at the opening exercises impressed his hearers, both patrons and pupils, with the idea that this year the school would be conducted with order and decorum, that every pupil would have definite duties to perform and it would be seen that these duties are performed. Nothing but favorable comment has been heard on his address and the way in which it indicates he will handle the school.

With Prof. Forbis are the following teachers in the high school faculty: Prof. M. L. Cozine Teacher of Agriculture, Miss Ruth Carpenter of North Carolina, History and English, Mrs. B. R. Robinson, Domestic Science, Mrs. Anna D. Mosby, French and Latin. And the following Grammar School teachers complete the faculty: First and second grades Mrs. Kennedy of Carthage, Tenn., third and fourth grades Miss Lucy Wetzler, fifth and sixth grades Mrs. W. A. Rhea Jr., seventh and eighth grades Miss Fannie Joe Latta.

It is confidently believed that the school has not had in the twelve years of its existence as a county high school any stronger faculty than this year, the student body is large and earnest, the Parent-Teacher Association active and enthusiastic, the people of the town interested and pleased and with a large number of the districts of the county represented in attendance. Every thing is favorable for a fine year's work and it is confidently looked for.

Poultry Exhibits To Feature Fairs

Reports from county agricultural and home demonstration agents made to Mrs. Florence Forbes, poultry specialist of the Davidson of Extension, show that there is more interest in the production of poultry in this state than for many years. Indications now are that the poultry exhibits at the various fairs this fall will be the best in the history of the fairs. Poultry raising is proving to be a paying industry in this section and more and more people are entering the business in one way or another. At practically all the fairs this year the premium lists have been made more attractive and will prove one of the big features. Another important step in connection with the exhibits at the county fairs is the conducting of culling demonstration which will do a great deal in stimulating breeders to improve their flocks.

Saturday's Cotton Meeting

Last Saturday's Cotton Meeting which was mentioned in these columns last week was one of the biggest gatherings we have seen in the circuit court room during the year. Every seat was occupied and the aisles were all full of standing listeners and attentive farmers. The crowd was conservatively estimated at 600 or 700 people, and we believe that number was present.

Talks were made by several different men from different parts of the county. Hon. J. P. Matthews of Oakland going into much detail of the plan of the work of the American Cotton Association.

No definite steps were taken toward a plan for marketing the present cotton crop, or holding it until it can be marketed at a profit to the producer. A motion which calls another meeting to be held on next Monday, September 20, was adopted and circulars have been issued calling said meeting to a session at that date, 2:30 p. m. next Monday, September 20. Every cotton grower and every man interested in cotton in the county is asked to be present then. A county branch of the American Cotton Association will be organized and plans will be discussed for the marketing of the 1920 cotton crop at a profit to the growers.

HOUSEKEEPER NEEDS THE VOTE

Ballot Is Necessary to Protect the Home Under Changed Conditions.

WOMAN'S VOICE IS NEEDED.

Housekeeping today is not what it used to be.

One hundred years ago our great grandmothers spun the cloth and made the clothes for the family. They employed the family cobbler for a week at a time, who made shoes for the year from leather cured and tanned on the premises. They baked the bread, churned the butter, cured the meat, and made the candies; in short, housed under their roofs all the activities that ministered to the necessities and comforts of the family. Today all these processes are carried on outside of the home. The shoes are made in factories, the clothes go through the sweatshops, the meat is cured by big companies, the bread is made at the bakeries, and the butter comes from the creameries.

Instead of living in houses open on all sides to the sun, we have the tenement house; instead of water directly from a well or spring, we have piped water; instead of the simple problem of letting the small amount of garbage decay in the sun, we have the vast problem of a city's disposal.

All of these matters of food, clothes, housing, water and garbage are subject to legislation. The state has taken the place of the parents. The question of regulation of all of these matters so vital to a housekeeper is one of collective opinion, expressed by the ballot.
